  Feedback
It is with great pleasure that I welcome you to the English-Speaking Union International Public Speaking Competition (IPSC) 2018.

2018 marks the centenary of the English-Speaking Union. We are celebrating 100 years of international dialogue and enhanced intercultural understanding through the medium of the English language.

Over the last century, the English-Speaking Union (ESU) has become a unique global education charity and membership organisation that brings together and empowers people of different languages and cultures. With the support of our worldwide membership we seek to build skills and confidence in communication, and give individuals the opportunity to realise their full potential. These opportunities act as a platform to engage in an exchange of ideas and opinions on an international scale.

The IPSC, now in its 38th year, is the largest public speaking competition in the world. Administered by the International department at Dartmouth House, the IPSC involves 600,000 students in over 50 countries, and represents one of the clearest manifestations of the goals of the ESU. Not only does the IPSC provide students with an opportunity to develop the vital skills that enable them to speak with confidence in public, but through the international final in London, students from around the world have the opportunity to meet, engage, and form friendships and understanding that will last a lifetime.

I should like to take the opportunity to thank those without whose hard work and dedication this competition would not be possible: all international branches of the ESU and organisers of national competitions which feed into the international final.

Thank you again for all your support and very good wishes in this Centenary year.

JANE EASTON, DIRECTOR-GENERAL,
THE ENGLISH-SPEAKING UNION
DATES

The deadline for submitting preliminary registration forms is Monday 5th February 2018. The preliminary registration forms should be completed by national competition organisers. The deadline for submitting participant information forms and accompanying guest information forms is Monday 19th March 2018. Information forms should be completed by participants and accompanying guests. The deadline for paying the registration fee is Monday 7th May 2018.

The IPSC programme will run from Monday 14th May 2018 to the evening of Friday 18th May 2018.

THEMES

There are two themes: the theme for national competitions and the theme for the international competition. This year’s theme for national competitions is “The best way to predict the future is to invent it” and may be used for national public speaking competitions. This year’s theme for the prepared speech heats of the international competition is “Great artists have no country”. Those advancing to the IPSC final will be asked to give the speech on “The best way to predict the future is to invent it”.
THE PROGRAMME

The IPSC is part of a five-day programme of events (Monday through to Friday), including public speaking, debating and performance workshops, educational and cultural excursions, and a two-day public speaking competition.

Workshops
As part of the five-day programme, participants receive training in public speaking and debating skills from world-class ESU mentors at Dartmouth House. The training sessions are geared towards the competition. Training in expression, delivery, listening and response skills are designed to improve the participants’ delivery of their prepared speeches and their ability to listen and respond to questions. Training in organisation and prioritisation of arguments, reasoning and analysis, as well as critical thinking skills are designed to improve the participants’ ability to write and deliver an impromptu speech. In addition, participants receive training at Shakespeare’s Globe Theatre in London. The Globe workshops are delivered by experts in drama, theatre and performance, and are also designed to enhance the participants’ expressive and persuasive abilities, as well as their improvisation skills and their self-confidence.

Excursions
As part of the IPSC programme, participants are taken on education and cultural excursions. In previous years, the programme has included tours of the Houses of Parliament, BBC TV studios, Hampton Court Palace, a trip to the theatre and more. The programme for IPSC 2018 will be available to participants in due course.

Heats and Grand Final
The competition takes place over two days of the IPSC programme. The prepared speech and impromptu speech heats are held on the Thursday, and the grand final takes place on Friday afternoon. There is a post-grand final reception at Dartmouth House on Friday evening.

Accompanying guests are welcome to attend the heats and final of the IPSC.

Accommodation
The participant registration fee covers bed and breakfast hotel accommodation in central London for five nights (Monday 14th May to Friday 18th May 2018 inclusive, with check out on the morning of Saturday 19th May).

The registration fee does not cover any extra accommodation which may be required by those who arrive early or leave late. Extra accommodation must be arranged with the hotel privately. All participants will be required to stay in accommodation provided by the ESU and will be asked to share a room with a fellow participant based on gender and age.

Accompanying Guests
Students who travel to London to participate in the IPSC are not required to be accompanied by an adult. However, participants are welcome to bring guests with them if they wish (usually a parent, guardian or public speaking coach).

“Accompanying guest” (for the purposes of the IPSC and this handbook) means a guest who has submitted the accompanying guest information form and paid the accompanying guest registration fee. Accompanying guests will not be accommodated for by the ESU. Registered accompanying guests will be guaranteed entry to the welcome reception, both sets of heats, the grand final and evening reception on the Friday. A maximum of two accompanying guests per participant may attend IPSC 2018. Accompanying guests will be responsible for sourcing their own accommodation. They may stay in the same hotel as participants at their own arrangement. Participants will be staying in either the Imperial or President Hotel, Russell Square, London (the Hotels are connected by a walkway).

Any person accompanying a participant who has not submitted the accompanying guest information form and has not paid the accompanying guest registration fee is not an “accompanying guest” (for the purposes of the IPSC and this handbook). Such persons will not be guaranteed entry to the welcome reception, either set of heats or the grand final.
Funding

The participant registration fee covers the following costs for the duration of the five-day IPSC programme: accommodation, travel in and around London (participants receive a travel card on arrival) and all meals. The participant registration fee also covers the cost of all workshops, tours and other events and excursions associated with the IPSC programme. The registration fee does not cover the cost of the participants’ air travel to and from London or the cost of the participants’ travel from the airports in London to their hotels.

The accompanying guest registration fee covers the following costs for the duration of the five-day IPSC programme: attendance to the welcome reception on the Monday and evening reception on the Friday, the heats and final. The accompanying guest registration fee does not cover accommodation, travel in and around London, any other meals or the cost of the accompanying guests’ air travel to and from London. London travel information can be found at tfl.gov.uk.

Participants may apply to have their registration fee partially or wholly waived or the cost of their flights partially or wholly funded by the IPSC Assistance Fund. Waiver and funding applications must be made in writing to the IPSC Convenor. Funds will be allocated at the discretion of the IPSC Convenor and on the basis of necessity (as demonstrated in participants’ written applications). Accompanying guests may not apply for funding from the IPSC Assistance Fund.
Participants must be students aged between 16 and 20 at the time of the competition (i.e. the oldest possible participant would turn 21 the day after the competition ends).

Participants must be passport holders or permanent residents of the country they are representing.

Themes

Participants must write and deliver a speech, the title and content of which are connected with the theme for the competition. Participants may interpret the theme in any way they wish, but may not use the theme as the title of their speech.

This year’s theme for national competitions is “The best way to predict the future is to invent it” and may be used by competition organisers for their national public speaking competitions. This year’s prepared speech heats theme for the international competition is “Great artists have no country”. All participants will be required to deliver a prepared speech on the prepared speech heats theme, as well as an impromptu speech.

Conduct of Rounds

All the information pertaining to the heats and the grand final, explained separately on pages 7-9, forms part of the competition rules.

Disqualification

Participants who breach the rules relating to registration, eligibility, themes or the conduct of rounds may be disqualified.

Participants who, in the opinion of the IPSC Convenor, act in a manner which would bring themselves or the ESU into disrepute may be disqualified.
CONDUCT OF ROUNDS

Structure of Competition

All participants will be required to compete in two heats: a prepared speech heat and an impromptu speech heat.

The prepared speech heats are the first competition stage, and all participants will be randomly allocated into six heats of around 9 participants each. After hearing all speeches in that heat, the judges will rank every participant in the heat from 1st-9th. Each participant is therefore given a unique ranking within that heat. These rankings will be used to draw the impromptu heats. Only those finishing in the top 5 of each prepared speech heat will be eligible for the main route to the grand final (see diagram pg 10).

All participants will then be drawn into six impromptu heats, with the top six from each prepared speech heat deliberately being kept apart. You will also be the only participant with your unique ranking in that particular impromptu heat. (E.g. if you ranked 3rd in the prepared speeches, you will not be drawn against anyone else who ranked 3rd.)

After each participant has performed their 3 minute impromptu speech, the judges will again rank all participants from 1st-9th. The top ranked participant in an impromptu heat that also finished in the top 5 in their prepared speech heat will automatically go through to the final. Those ranked outside of the top 5 in their prepared speech heat will only be eligible to advance to the Grand Final via the Wildcard route.

Wild cards are those who ranked outside of the top 5 in the prepared speech round and then were ranked first in their heat in the impromptu speech round. There will be a maximum of 2 wild cards allowed entry to the grand final. In the event of more than 2 participants meeting the criteria to be a wild card, the prepared speech ranking will be used to split participants. In the unlikely event that participants are still level, the ESU’s Director of Education will review video or audio footage of the tied potential wild cards’ prepared speech performances and judge which 2 extra participants should proceed to the grand final.

Rankings from both sets of heats will not be made public during the week of IPSC itself. However, the top 5 ranked participants from every prepared speech heat and every impromptu speech heat will be informed of their ranking digitally in the weeks following the competition.

Heats – Prepared Speeches

The prepared speech heats are the first stage of the competition.

Participants are randomly assigned to one of six heats (determined by the IPSC Convenor).

Participants speak in a random order (determined by the IPSC Convenor).

Participants deliver their five-minute prepared speech (which must be connected with the prepared speech heats theme).

A timekeeper gives an audible signal at 4 minutes and 30 seconds (to indicate that 30 seconds remain), at 5 minutes (to indicate that the participant’s time is up), and at 5 minutes and 30 seconds (at which point the participant must conclude their speech immediately).
Participants who speak for fewer than 4 minutes and 30 seconds or more than 5 minutes and 30 seconds may be penalised by the adjudicators.

The speech is immediately followed by a 3-4-minute question period.

Questions may come from members of the audience or members of the adjudication panel and participants should respond to each question individually.

Audience members who are connected with a participant (e.g. a family member or an accompanying guest) may not ask questions of that participant.

No visual aids, props or amplifying microphones may be used (recording devices may be used with prior permission from the IPSC Convenor).

The adjudicators judge the participants in the heats in accordance with the adjudication guidelines and the marking scheme for prepared speeches, and the speaker scale, contained in this handbook.

Participants may seek feedback from the adjudicators, but only after the decision has been announced.

The adjudicators’ decision is final.

A ranking will be given to each participant based on the speaker scale. This ranking, along with the impromptu heat ranking, will determine which speakers go on to perform in the grand final.

Heats – Impromptu speeches

The impromptu speeches are the second stage of the competition. Participants are assigned to one of six heats (determined by the IPSC Convenor).

Participants speak in a random order (determined by the IPSC Convenor).

Participants deliver a three-minute impromptu speech on a new topic. Participants choose their topic from a list of three, which they receive 15 minutes before they must deliver their speech.

During the 15-minute preparation period:

- participants are given a quiet room in which to choose their topic and prepare their speech;
- participants may not use any printed or electronic resources for the purpose of research;
- dictionaries and writing materials (blank paper, palm or cue cards, pens, pencils etc.) are made available to participants.

A timekeeper gives an audible signal at 2 minutes 30 seconds (to indicate that 30 seconds remain), at 3 minutes (to indicate that the participant’s time is up) and at 3 minutes and 30 seconds (at which point the participant must conclude their speech immediately).

Participants who speak for fewer than 2 minutes 30 seconds or more than 3 minutes 30 seconds may be penalised by the adjudicators.

The impromptu speech is not followed by a question period.

No visual aids, props or amplifying microphones may be used (recording devices may be used with prior permission from the IPSC Convenor).

The adjudicators judge the participants in the impromptu speech heats in accordance with the adjudication guidelines and the marking scheme for impromptu speeches, and the speaker scale, contained in this handbook.

Participants may seek feedback from the adjudicators, but only after the decision has been announced.

The adjudicators’ decision is final. A ranking will be given to each participant based on the speaker scale. This ranking, along with the prepared speech heat ranking, will determine which speakers go on to perform in the grand final.
Grand Final

Participants speak in a random order (determined by the IPSC Convenor).

Participants deliver their five-minute prepared speech (on the theme of “The best way to predict the future is to invent it”).

The rules relating to timing, questioning and adjudication apply to the grand final exactly as they apply to the prepared speech heats (see above).

No visual aids or props may be used. Amplifying and/or recording microphones may be used at the discretion of the IPSC Convenor (other recording devices may be used with prior permission from with IPSC Convenor).

The adjudicators select a winner and a runner up, both of whom receive an award.

Fig. 1

- The chairperson introduces the speaker, giving their name, country and the title of their speech. After the speech, the chairperson invites questions from the audience and the adjudicators. Questions must be addressed to the chairperson.

- The timekeeper records the length of each speech for the adjudicators and gives audible signals indicating how much time has elapsed for each speech.

- The chairperson and the timekeeper sit together at the front or at the side of the room in view of the speaker, the adjudicators and the audience. The speaker stands at the front of the room, in view of the adjudicators and the audience.

- The adjudicators (adjudication panel) sit at the back of the room, behind the audience.
Fig 2. How participants can reach final of IPSC

**ROUTE 1: MAIN ROUTE TO FINAL**

- Prepared speech heat: Finish in the top 5
- Finish top in the impromptu speech heat (or highest of those not open to wild card route)

**ROUTE 2: WILD CARD ROUTE TO FINAL**

- Prepared speech heat: Finish outside the top 5
- Finish top in impromptu speech heat

**PLACE IN IPSC FINAL**
Will my topic capture the interest of the audience? – The audience and the adjudicators do not necessarily have to be interested in the speaker’s topic to be persuaded by the speech. Speakers should try to make their speech more engaging by demonstrating the relevance of their arguments to the audience and the adjudicators (e.g. The allocation of government resources may seem like a boring topic to some audience members until one considers that the topic could be linked to the availability of teachers or hospital beds. Similarly, intellectual property law may be something that few people are interested in until one considers its link to illegal downloading.).

Will I be able to research my topic effectively? – Speakers will need a certain amount of evidence to support their arguments and persuade the audience. The speaker’s topic must be one which they can research effectively using the resources available to them (the school or university library, the local library, the internet etc.). Researching the topic area is important; not only for the speech itself, but for the question period when the speaker’s background or ancillary knowledge of the issues is put to the test.

Will I be able to discuss my topic in the limited time available? – Some topics or subject areas are particularly obscure or otherwise unfamiliar and would require a significant amount of explanation to make the information accessible to the audience and the adjudicators.

For example, it would probably be impossible to convince an audience that ‘The Meiji Restoration in Japan was unfair on the daimyos’ in five minutes. The speaker would have to begin by outlining the state of Japan before the restoration, then explain what a daimyo is, and then present analysis of those two descriptions or explanations to prove that the daimyos suffered wrongly as a result of the restoration.

Any background, contextual or technical information required should not take up more than a few sentences of the speech. If such information requires elaborate explanation, speakers should consider refining their topic.
Research

Once the speaker has decided on a topic for the speech and has taken the time to think about all the possible angles or arguments, they should begin researching in more depth. Even where the speaker has prior knowledge of the topic, it is important for them to broaden their perspective as much as possible, and to ensure that the evidence and information they use in their speech is reliable and up-to-date.

Speakers should bear the following points in mind when researching their topic:

Different types of sources – Speakers should aim to utilise fact-based resources (e.g. encyclopaedias), academic resources (e.g. journals or reports) and opinion-based resources (e.g. newspapers or news websites).

Up-to-date information – Speakers should ensure that the information they are relying on to support their arguments is up-to-date. The internet (e.g. Google) is invaluable for checking that the information already obtained (e.g. a journal or newspaper article) is the most up-to-date information available.

Multiple sources – Speakers should aim, where possible, to have more than one source of evidence, particularly where statistics are involved. It is generally unwise for a speaker to allow one piece of evidence, from one source, to underpin an entire argument in their speech.

Anecdotal evidence – Anecdotal evidence (personal stories, myths, memories etc.) is generally unpersuasive, as it usually lacks clarity, certainty and universal applicability. However, depending on the nature of the speech and the style of the speaker, anecdotal evidence can sometimes be used to great effect (particularly if the speaker’s primary goal is to entertain or inspire empathy in the audience; anecdotal evidence can be used to demonstrate the human dimension of an issue).

Brainstorming

Initial brainstorm – One way for speakers to decide on a topic is to write down as many words and ideas as they can think of that are connected with the theme in 60 seconds. Another method is to take individual words from the theme (or various different permutations), put them into a search engine (e.g. Google) and see what kind of results come back. A similar exercise involves taking individual words from the theme (or various different permutations) and putting them into an online dictionary or thesaurus. The resulting definitions, synonyms or antonyms may inspire an interesting idea for a speech.

Secondary brainstorm – Once the speaker has decided on a topic for the speech, it is useful to go back and brainstorm again; writing down all the words and ideas relating to that topic that come to mind in 5 minutes. This process will help the speaker to identify all the possible arguments which they may want to use in their speech. It will also help the speaker to decide how best to group those arguments. Finally, it will help the speaker identify arguments which they may not be able to use in the speech, but which may be useful when answering questions.
The two opening paragraphs convey the same basic information (the audience and the adjudicators know the general theme of the speech, and that a problem is going to be outlined and a solution proposed). However, whereas the former paragraph is measured and dispassionate, the latter is dramatic and conveys a sense of urgency. An excellent way to grab the attention of an audience or an adjudication panel is to make the speech relevant to them (i.e. “how crucial a role we all have to play”). The use of single words or very short sentences at the start of a speech (i.e. “Death. War. Destruction on a global scale.”) makes for a dramatic opening (a shocking statistic or quote can have a similar effect). Note also the use of alliteration for emphasis (i.e. pump/poisonous and fact/fiction), the use of powerful or dramatic language (e.g. doomsday scenario), and the contrast between long and short sentences (i.e. the short sentence fragments at the start of the paragraph, then two long sentences, then two short sentences at the end; punctuating the end of a dramatic opening).

An opening that conveys a sense of humour or sorrow (or another emotion) can also be effective. The most effective type of opening will be determined by the subject matter of the speech and the speaking style of the speaker.

Similar emphasis should be put on the conclusion of the speech. It should link back to the opening of the speech (e.g. the problems that were identified, the questions that were posed etc.). All the techniques identified above (and much, much more) may be used to help a speaker to achieve a dramatic or otherwise memorable conclusion. It is often effective, at the end of a speech, to finish with a rhetorical question (something for the audience to ponder during the applause!).

Verbal skills
Speakers should remember that delivering a speech is not like reading an essay. If the reader of an essay misses a line or misunderstands a phrase, they can go back and re-read it. If a person listening to a speech misses a line or a phrase, they don’t get an opportunity to hear it a second time (often resulting in a loss of continuity for that listener and the loss of that listener’s attention for the speaker). For that reason, when giving a public speech, it is imperative that speakers speak slowly, clearly and loudly. This will help to ensure that the audience and the adjudicators hear every word, and can comprehend what is being said as they are listening.
Speakers should also attempt to vary their pitch and tone of voice, as well as the pace of their speech (where appropriate). These variations help to keep the audience and the adjudicators alert, and help the speaker to maintain their attention for the full five minutes of the speech.

Pauses can also be extremely effective. Two or three well-timed pauses can effectively juxtapose five minutes of constant speaking, and can be used to emphasise an important point or signal the transition from one section of the speech to another. The use of particular language in conjunction with the use of pauses can also be very effective (e.g. “that was followed by a pregnant pause” or “the silence was deafening”).

**Non-verbal skills**

Much of a speaker’s communication is non-verbal. For that reason, public speakers must be conscious of their body language if they are to engage the audience and the adjudicators. ‘Open’ gestures (which help to engage the audience) include facing the audience, and using hands and arms freely to demonstrate, emphasise or otherwise support the words being spoken. By contrast, ‘closed’ gestures (which often disengage the audience) include the speaker folding their arms, facing away from the audience or hanging their head.

The use of facial expression and eye contact are both related to good body language, but are uniquely important. If the audience and the adjudicators are to be persuaded or inspired by a public speech they must feel engaged by the speaker and must feel like the speaker is speaking directly to them. As a general point, speakers should smile; but facial expression may also be used to mirror the message or emotion being conveyed by the speech (e.g. a humorous quote, a shocking statistic, a sorrowful narrative etc.), adding a sense of sincerity or truth to the words being spoken. Eye contact is another important way for speakers to engage with the audience and the adjudicators, and convince them of their confidence and their credibility.

Movement is another technique which public speakers use to keep the audience and the adjudicators alert. Similar the effect of changing your pace or tone of voice, or the use of pauses, physically moving your body during your speech has the effect of varying what the audience is hearing and seeing, which helps to maintain their attention. The use of movement can be particularly effective at certain points in the speech (e.g. taking a step forward when transitioning from one section of the speech to another) or when used in conjunction with particular language (e.g. physically taking a step back and saying “let’s take a step back and look at the historical context of this issue”). Finally, the freedom to move allows the speaker to see every audience member, which is particularly important when trying to maintain eye contact in a large room.

**Linguistic skills**

Speakers should ensure that their use of vocabulary is consistent (i.e. avoid using multiple words interchangeably to convey the same meaning, as this may lead to confusion). Speakers should also aim to ensure that the intended meaning is conveyed by the words they choose. English is full of synonyms (i.e. two or more different words that refer to the same object or concept). Different words, used in different contexts, often conjure up slightly different versions of the same idea. It is useful to examine the use of a word in the media to appreciate the full implications of its use (e.g. Does the US government refer to insurgents as “freedom fighters” or “terrorists?” Do animal rights campaigners refer to cattle farmers as “agricultural workers” or “murderers?”).

Speakers should also avoid the use of colloquialisms or slang, not because of any perceived lack of formality; but because audiences at the IPSC will usually be representative of over 50 countries and to use colloquialisms or slang would be to run the risk of excluding certain audience members from the intended meaning. In a similar vein, speakers should resist the temptation to use overly lofty or ornate language, which often undermines the clarity of the speech. When trying to communicate an idea to a large group of people, it often helps to keep the language simple and clear.
Speakers who have spent a lot of time researching for their speech will probably be very familiar with the surrounding issues, as well as background or ancillary subject matter. However, speakers should bear in mind that most audience members will not have their level of specialist knowledge on the issue and should therefore avoid the use of technical, specialist or abbreviated jargon or other unfamiliar terminology (without explanation).

Finally, the IPSC is a public speaking competition which is conducted through the medium of the English language. However, it is not an English language exam. Speakers are not penalised under Expression and Delivery [or under any other section of the marking scheme] for occasional grammatical errors, mispronunciations etc.

Confidence and style
Confidence and style are at the core of effective expression and delivery. Speakers feel more confident, and exude that confidence when delivering their speeches, by following the tips discussed above [having a clear purpose or goal, making an impact from the start with a dramatic or otherwise memorable opening, and using verbal, non-verbal and linguistic skills or techniques effectively].

A good way to practice projecting confidence is for public speakers to record themselves delivering their speech (audio-visual recording and in front of an audience, if possible). This allows speakers to go back and assess their own strengths and weaknesses under the sub-categories identified above. It also allows the speaker to assess the sections of the speech to which the audience reacted positively, and those they did not [and the effect that those reactions had on the speaker’s performance and confidence during the speech].

Once speakers have mastered the art of projecting confidence when speaking in public, developing a speaking style comes next. A compelling speaking style is what makes a speaker unique [and what maximises their marks under Expression and Delivery!]. Some speakers have an emotive speaking style, and feel most comfortable persuading the audience of important social, economic or global issues (e.g. environmental issues, political issues, humanitarian issues etc.). For such speakers, an ability to convey passion and emotion is a huge strength. Other speakers have a witty, light-hearted or humorous speaking style and feel most comfortable when entertaining the audience; often delving into satire and using rhetorical devices such as sarcasm and irony to great effect. Light-hearted speakers often prefer to use narratives to communicate their ideas, rather than structured arguments supported empirical evidence. Both methods of illustration can be effective, depending on the subject matter of the speech and the natural style of the speaker.
Rather than writing out their speech in full and learning it by heart, speakers are advised only to write out the structure of their speech [see the section on structure below]. Speakers should know their introduction and conclusion very well (i.e. learnt by heart), and should know the progression of the points in the main body of the speech well [but not learnt by heart]. Speakers should use their notes [while they are speaking] to remind themselves of the structure of their speech and the progression of the points within the main body of their speech, so that they can construct each individual sentence and argument afresh every time they deliver the speech. This allows the speech to retain a sense of novelty and reality each time it is delivered. It also ensures that when the speaker is speaking, their engagement is with their ideas and with the audience; not with a collection of words that have been committed to memory in a particular sequence.

The following are a few additional tips to enhance confidence and style: speakers should (1) know the opening lines of their speech off by heart, (2) take a few deep breaths before they speak, (3) avoid wearing uncomfortable or distracting clothing or jewellery, (4) take a drink of water before they start to speak and have a glass or bottle of water with them during their speech and (5) remain calm if they slip or stumble over a word or lose their position in their speech – pause, take a drink of water and continue.

**A note on notes**

Using notes effectively [or ineffectively as the case may be] is often what makes or breaks a good public speech. Most people who speak in public as part of their professional life (e.g. politicians, university professors etc.) usually rely on notes, palm cards, Teleprompters, PowerPoint slides etc., to a certain extent. It follows, therefore, that in the context of a public speaking competition, it is entirely appropriate [and indeed expected] for speakers to have some notes.

The key is striking the right balance between, on the one hand, being entirely reliant on notes [i.e. reading the speech from a piece of paper and failing to make eye contact with or engage the audience in any other way], and on the other hand, not relying on notes at all [i.e. reciting a speech, which has been learnt by heart, for the thirtieth time and sounding over-rehearsed or bored with the speech].
Reasoning and Evidence

Statement of intent
Providing the audience and the adjudicators with a statement of intent at the start of the speech lets them know what the speaker is trying to achieve with their speech, what the targets are etc. The statement of intent also gives the audience and the adjudicators a glimpse of the content or subject matter of each section of the speech.

For example, consider the following statement of intent: “Ladies and gentlemen, by the end of my speech I hope to have convinced you, not only that global poverty must be eradicated, but that it is a goal which is achievable in our lifetime, and that we have a responsibility to strive for the achievement of that goal.”

Using empirical evidence
There are various different types of evidence which a speaker may use in support of an argument in their speech – statistics from academic or scientific reports, statistics from newspapers or websites, quotations from academic journals or reports, quotations from newspapers or websites etc.

However, any empirical evidence used in support of an argument should (1) have a reliable source, (2) be up-to-date and (3) be relevant to the speech. Irrelevant evidence, evidence that comes from an unreliable source, or evidence that is out-of-date will inevitably undermine the credibility of the argument and the speaker.

Speakers should avoid using too much empirical evidence. Speeches that contain large amounts of facts and figures or lengthy quotations are unlikely to be particularly persuasive, because the audience and the adjudicators are unable to absorb large amounts of statistics, large excerpts from reports etc.

Speakers should also remember that simply stating the evidence is not a substitute for explaining their arguments logically, providing the audience with certain pieces of evidence in support of those arguments, and analyse the evidence to demonstrate how or why it supports the overall thesis of the speech. Ultimately, any empirical evidence used should support or complement an argument in the speech, not dominate it.
Using reasoned analysis and logic

Whether or not an argument is supported by evidence, examples or analogies, the audience and the adjudicators must be given some analysis explaining why what the speaker is saying is true and why what the speaker is saying supports the overall thesis of the speech.

When making an argument, speakers should try to avoid making assertions, assumptions or other errors in logic. Evidence, analogies, examples or other facts should be presented in a logical order such that they support the argument being made and lead to an obvious or logical conclusion. Crucially, each statement of fact or opinion should follow logically from the previous one and support the overall argument. Speakers should avoid presenting a series of seemingly disconnected statements.

For example, a good deductive argument goes:

1. All men are mortal.
2. Socrates was a man.
3. Therefore, Socrates was mortal.

Whereas, a bad deductive argument goes:

1. All men are mortal.
2. Socrates was a man.
3. Therefore, all men are like Socrates.

Using examples and analogies

An argument does not always have to be supported by facts, figures, quotations etc. Arguments can also be supported by analogies or examples of things which people know to be true under the status quo (i.e. without reference to statistics or quotations from credible sources to demonstrate or prove the truth of the example).

For example, in a speech proposing to legalise the sale, distribution and consumption of marijuana (in a country where it was previously illegal), rather than citing statistics from scientific reports or quotations from academic articles, the speaker could support their arguments by reference to another country where the sale, distribution and consumption of marijuana is already legal (e.g. the Netherlands). Similarly, rather than spending a lot of time justifying age limits or explaining an intricate licensing system, the speaker could simply support their arguments by reference to an analogous system in the same country (i.e. the age limits and licensing system applicable to the sale of tobacco in that country).

Arguments supported by analogies or examples, which most people accept as true under the status quo, are often even more persuasive than arguments supported by statistics or quotations, the sources of which many people may be unfamiliar with.
Credibility is key!
Credibility is an important part of public speaking. This doesn’t mean being the most knowledgeable or qualified person in the room; it means presenting strong, logical arguments in support of your position (remember that the audience and the adjudicators probably won’t have detailed knowledge or experience of the issues relevant to the speech either).

Just as mastering all the elements of Expression and Delivery leads to a confident speaker; mastering all the elements of Reasoning and Evidence leads to a credible speaker.

Dealing with conflicting evidence and opinions
Most speakers try to give speeches on issues which are topical and interesting. Many of those issues will be unresolved or debatable. There will be arguments on both sides. During research, speakers will discover evidence or other information which does not support the conclusion of their speech or with which they disagree.

This evidence or information should not be ignored! An interesting speaker will invariably make statements which are bold or controversial. A brave speaker will acknowledge the existence of evidence or opinion contrary to the conclusion of their own speech and utilise their persuasive skills and their own evidence to persuade the audience of their credibility and the truth of their own arguments.

There are a number of ways to challenge or undermine pieces of evidence or information which support a conclusion contrary to that presented in the speech. The speaker may argue that the evidence is out-of-date or that the source of the evidence is unreliable (e.g. blogs by unknown persons are usually unreliable, as is anecdotal evidence generally). The speaker may argue that the evidence is irrelevant (e.g. because it relates to a specific country or a specific set of circumstances not applicable to the speech). The speaker may also argue that the evidence fails to take account of other issues (e.g. unavoidable practical obstacles may negate the possibility of implementing a solution to a problem which is sound in principle).

It is important to remember that audiences aren’t passive. They are made up of people who also have opinions about the things they see and hear in the world around them. Ultimately, an audience is more likely to be persuaded by a speaker who understands and has engaged with both sides of an argument, but can still justify their stance on one side or the other.
Organisation and Prioritisation

Why structure is important

An audience is made up of people. An adjudication panel is made up of people. Most people have relatively short attention spans. For that reason, if a speaker stands up, starts speaking and continues to speak constantly for five minutes, most people [including audiences and adjudicators] will tune out after about 2 minutes.

Public speakers’ use structure to help maintain their listeners’ attention. By telling the audience and the adjudicators at the start what they can expect to hear, presenting the arguments in order of priority, gravity or importance, and reiterating what they have heard at the end, the speaker gives their speech a sense of symmetry or unity and compounds the arguments in the minds of the audience and the adjudicators.

Structure can also be used by speakers to make their speech more interesting [and therefore easier to follow]. For example, many speakers group their points or arguments into categories at the start of their speech [e.g. principled arguments and practical arguments]. Another example is when speakers give each group of points or arguments a label which is part of a theme that runs right throughout the speech [e.g. the theme of the speech is “the passage of time” and the three points are labelled “past,” “present” and “future” or the theme of the speech is “questions answered” and the three points are labelled “what,” “when,” and “how.”].

Using structure creatively [e.g. by categorising arguments in an interesting way or by giving the structure a theme] allows the speaker to incorporate their own speaking style into their structure and maximise their marks under Organisation and Prioritisation.

The outline of a typical speech

Introduction – The speaker should tell the audience who they are, what they are speaking about, why, and what they want to have achieved or proven by the end of the speech. A map of the main points in the speech should be provided. Each point should be given a label [see above] and perhaps a brief explanation of what will be analysed.

Main Arguments – The speaker should then move onto to the main points of the speech, remembering to deal with each point in order of priority [in the same order they were listed in the introduction], and remembering to signal to the audience when they are moving from one point to the next [this is signposting or flagging].

Conclusion – The speaker should tie together all the main points of the speech at the end, remembering to refer back to the introduction [in particular, to any specific targets or goals that the speaker intended to achieve or prove]. The conclusion should not be a simple re-statement of the speech; rather, it should be a comprehensive but succinct summary of all the main strands of the speech in support of the overall thesis of the speech.

NB: The outline described above is just one way of structuring a speech. Speakers will not lose marks under Organisation or Prioritisation just because they structure their speech or organise their points in a slightly different manner to the one presented above. In particular, the structure outlined above is not always suitable for speakers who prefer to use a narrative as a method of illustration. Crucially, the speech must be easy for the audience and the adjudicators to follow and understand. Speakers who achieve that aim in an interesting way will receive good marks under Organisation and Prioritisation.
Using notes effectively

Having a speech that is well structured makes it much easier for speakers to make their notes and refer to their notes during the speech. Some speakers prefer to use palm cards or cue cards and other speakers prefer to use sheets of paper. Either approach is acceptable and both have their advantages and disadvantages.

Speakers who use palm cards or cue cards can have one colour card for their introduction or opening statement (which they will usually write out in full, particularly if it contains a quotation or a statistic), another two or three colours for the two or three main points of their speech (usually speakers will not write out the arguments in the main sections in full but will have key words to remind them of the progression of their arguments, as well as any statistics or quotations in support of those arguments), and another colour card for their conclusion or summary (which, again, should contain all the main strands of the speech and may be written out in full, particularly if it contains a quotation or a statistic).

Speakers who use sheets of paper can have three sheets of paper, one for each of the main sections of their speech. The title of each sheet of paper could be the title (or ‘label’) of that section. Speakers could also have another sheet of paper with the text of the introduction and/or conclusion written out in full.

The advantage of palm or cue cards is that they are generally smaller than sheets of paper, making it easier for speakers to hold the cards in one hand while still having the freedom to move and gesture with ease. The disadvantage of using cards is that they may get mixed up resulting in the speaker losing their position in the speech (colour coding or numbering cards helps to avoid this). The advantage of using sheets of paper is that the speaker can put more supporting information on the sheet if they wish, and all the information pertaining to one argument is available to the speaker, on one sheet, at a glance. The disadvantage of using sheets of paper is that they can be cumbersome and distracting, making it more difficult for the speaker to move and gesticulate easily.

Timing

Timing goes hand-in-hand with structure and notes. Once a speaker has established a good structure for their speech and has found the method of using notes which works best for them, it’s important to practice delivering the speech within the five minutes allowed.

A good speaker will know exactly how long they are going to spend on each section of their speech (i.e. introduction, main sections and conclusion). Some speakers will write timings on each card or sheet of paper so that they know when they have to move on to the next section. Speakers should try to ensure that they spend a similar amount of time on sections of the speech of similar importance (i.e. if a speaker identifies two important points that they want to cover in their introduction and then spends 3 minutes on the first point and 30 seconds on the second point, the adjudicators will assume that the speaker simply ran out of time for the second point – which suggests insufficient preparation).

Speakers should practice speaking for one minute, two minutes, three minutes etc., so that they know what it feels like to speak for different blocks of time and how much information they are able to cover in those blocks of time (speakers should also remember to speak extra slowly when practicing, to train themselves to speak slowly during the competition).

Finally, there will be a timekeeper at all stages of the competition, who will give audible signals to indicate how much time has elapsed. However, it is entirely appropriate for speakers to have a stopwatch or another electronic timing device with them when they get up to speak.
Listening and Response

Answering Questions
Most public speakers have to justify the arguments made in their speech at some stage (e.g. school teachers, university professors, politicians etc.). The question period after the speech is designed to test the speaker’s knowledge of the surrounding issues, as well as their ability to listen and respond to questions, justifying the position they have taken in their speech.

As part of their preparation, speakers should have considered alternative points of view to those presented in their speech and considered how best to respond to those alternative points of view if presented in the form of a question (questions from the audience and the adjudicators are generally not combative – this is not a debating competition – but speakers may be asked to justify their views).

Speakers should always listen to the question that is actually asked and avoid giving prepared answers to anticipated questions. Speakers frequently have questions put to them which they did not anticipate. Speakers should start thinking about the answer as the question is being put to them (while remembering to listen all the way to the end), but should never answer the question immediately after it has been asked. It is important to pause for a moment or two, consider again the question that was actually asked, and make sure that the answer being given is relevant to that question.

When answering questions, speakers should avoid re-stating sections of their speech verbatim. The question period is a great opportunity for speakers to demonstrate extra knowledge [perhaps an extra piece of evidence that there wasn’t room to include in the speech]. However, answers should always be relevant to the question asked and ultimately support the position taken in the speech.

Questions from the audience are often lengthy and convoluted, which can make it difficult to establish what the audience member or adjudicator is actually asking. Speakers should take a moment to try and break down what the questioner has said in their head. Speakers should also be willing to ask the questioner to repeat the question in a shorter or simpler form if necessary (if the speaker didn’t understand the question, there’s a good chance that at least some other audience members or adjudicators didn’t understand it either!).

The question period only last for 3-4 minutes. Speakers should not feel obliged to give lengthy answers to questions, even where the question itself was lengthy or convoluted. The best answers to questions are usually brief, succinct and to the point. Lengthy answers often lose the attention of the audience and the adjudicators.

Finally, all the tips that are given under Expression and Delivery (above) apply to the question period exactly as they apply to the speech. It’s important to continue to use body language and eye contact etc. effectively during the question period, and maintain confidence generally. Speakers may be asked to justify their position during the question period, but should avoid becoming defensive or entering into a debate with a particular questioner.
Impromptu speeches

GETTING STARTED

Choosing a topic

At the impromptu heats stage of the competition, speakers only have 15 minutes in which to choose their topic and prepare their speech. All the topics will be relatively broad and specialist knowledge will not be expected by the adjudicators. Speakers can interpret the topic as narrowly or as broadly as they wish and can speak for or against the topic. Speakers should choose the topic that they know the most about, and the topic with which they think they can do something interesting or original.

Brainstorming

During the 15 minute preparation period, speakers will not have the time to engage in the same level of detailed brainstorming or research as that describe above (in the Prepared Speeches section). However, speakers should take 1-2 minutes at the start of the preparation period, after they have selected their topic, to write down as many words and ideas as they can think of which relate to their chosen topic.

This will help inspire ideas regarding how best to group or categorise points [bearing in mind that in three minutes the speaker will probably only have time to make one or two points], and how best to approach the topic (e.g. using the narrative as a method of illustration, taking a satirical approach to the issue, giving a hard-hitting, critical or passionate account of a serious issue etc.).

KEY ELEMENTS

Expression and Delivery

All of the above

All the guidelines and tips outlined above under Expression and Delivery (having a clear purpose, making an impact from the start with an interesting opening, making use of verbal, non-verbal and linguistic skills, and demonstrating a sense of confidence and style) all apply to impromptu speeches exactly as they apply to prepared speeches.

Speakers should also remember that, with only 15 minutes to prepare, they are not expected to have a fully written out speech and should not spend their preparation time attempting to write out a speech in full. However, speakers should make some notes for reference during their speech. They should focus on having a good introduction and conclusion (and thinking about how best to deliver those sections), and they should think about the one or two main points that are going to form that main section of the speech (bearing in mind that if the introduction takes 30 seconds and the conclusion takes 30 seconds, that only leaves approximately 2 minutes for the main section of the speech).

Confidence is key!

The most important thing to remember about the impromptu heats stage of the competition is that it is not a test of the speaker’s knowledge and it is not an English language exam. The adjudicators are looking for the speaker who can take a broad, general topic and do something original or interesting with it. Speakers who give an engaging speech, the content of which is somehow related to the topic, with confidence and style are likely to score highly under Expression and Delivery.
Organisation and Prioritisation

All of the above

All the guidelines and tips outlined above under Organisation and Prioritisation (the importance of good structure, using structure creatively, having a strong introduction and conclusion, signposting, using notes effectively, and managing time) apply to impromptu speeches exactly as they apply to prepared speeches.

Deciding on the structure of the speech early in the preparation period makes it easier for speakers to plan what they are going to say and ensure that they speak for the full three minutes. For example, it may be daunting for a speaker to think that they have to speak for 3 minutes continuously on any given topic. However, it is much less daunting if the speaker divides up their time and considers that they only have to speak for 30 seconds on their introduction, 60 seconds on their first point, 60 seconds on their second point and 30 seconds on their summary or conclusion (for example). Once speakers have practised giving impromptu speeches, they will find that it is actually quite difficult to speak on any topic for less than three minutes!

Reasoning and Analysis

Using examples, analogies, reasoned analysis and logic

The audience and the adjudicators know that the speaker has only had 15 minutes to prepare their remarks. To that end, the speaker is not expected to have statistics, quotations etc. in support of any arguments they make. However, speakers who use examples and analogies effectively to support their arguments, and speakers who are able to explain their arguments in a logical manner, are likely to be persuasive and be rewarded under Reasoning and Analysis.

Be original and keep it simple!

As has been outlined above, the impromptu speech stage of the competition is not a test of the speaker’s knowledge. While the Reasoning and Analysis section focus on content (as opposed to style), the ‘content’ that the adjudicators are looking for is something original and interesting. Speakers should try to avoid overly complex or convoluted arguments.

For example, a speaker who chose the topic “men and women will never be equal” could take a satirical view of stereotypically masculine roles and stereotypically feminine roles and comment on the ways in which those roles have (or have not) changed with the passing of time. Speakers should also remember that they are free to speak for or against the topic as it is phrased.

Similarly, a speaker who chose the topic “democracy is the worst form of government” could give a passionate account of what it means to ‘stand up and be counted,’ what it means to have your voice heard and your vote acknowledged, what it means to play a part in shaping the society you live in for future generations etc. Again, speakers should always remember that they are free to disagree with the topic as it is phrased.
GUIDANCE FOR ADJUDICATORS

General Overview

Participants and spectators must be confident in the competence of the adjudicators if they are to accept their decisions and take their advice on board. For that reason, adjudication should be as professional as possible at all stages of the competition.

At the IPSC, the adjudication panels for both of the heats are made up of public speaking and debating coaches, university students who have competed in public speaking and debating competitions at school and university level, and IPSC alumni (i.e. those who have competed in the IPSC in previous years). The adjudication panel for the grand final of the IPSC is made up of accomplished public speakers and communications experts, many of whom use their oratorical and persuasive skills as part of their professional lives (e.g. TV and radio presenters, lawyers etc.).

At all stages of the competition, adjudicators should be mindful of the distinction between a prepared speech and an impromptu speech. Specific guidelines for adjudicating both types of speech are set out separately below. However, the following overarching principles should be borne in mind by adjudicators when adjudicating either type of public speech:

Audibility – Can the speaker be heard? A good public speaker will speak slowly, clearly and will utilise a range of verbal skills such as varying their pace, pitch and tone of voice to maintain the attention of the audience and the adjudicators.

Argument – Has the speaker delivered a speech, which is persuasive, informative, inspiring and/or entertaining? A good speech will be well structured, the arguments will be presented in a coherent and logical manner, and the content of each argument will be supported by some form of evidence or analysis.

Audience – Has the speaker effectively engaged with and built a rapport with the audience? A good public speaker will utilise a range of verbal, non-verbal and linguistic skills, as well as the structure and content of their speech, to maintain the attention and interest of the audience.

Adaptability – Has the speaker demonstrated an ability to think on their feet? A good public speaker will not sound over-rehearsed, and will demonstrate adaptability by [for example] pausing their speech to allow for an unanticipated interruption (e.g. applause or laughter from the audience), making a spontaneous or unscripted comment or argument where appropriate and/or responding to questions confidently and without recourse to the text of the original speech.

Appearance – Does the speaker have a confident and commanding presence on the platform or at the podium? A good public speaker will utilise body language, facial expression, eye contact and gestures effectively to engage the audience and the adjudicators.
**Prepared Speeches**

Notwithstanding the general principles laid out above, when adjudicating a prepared speech, adjudicators should consider the guidance for speakers for prepared speeches set out on pages 11-22 of this handbook (and should consider those pages part of the adjudication guidelines for prepared speeches).

The key point for adjudicators to bear in mind for the heats and the grand final is that all speakers will have had a considerable amount of time to interpret the theme, choose a topic and a title, research the topic, write a speech and practice delivering that speech.

It should be evident from the speech that the speaker has researched and thought about the chosen topic, and the arguments in the speech should be supported by an appropriate level of evidence and/or analysis. It should be evident from the question period that the speaker has a reasonable level of background and/or ancillary knowledge relating to the topic. Speakers who demonstrate an ability to reinforce their arguments by reference to additional evidence or analysis, not contained in their speech, should be rewarded.

It should also be evident from the speech that the speaker has not learnt their speech word for word. Speakers who demonstrate a sense of spontaneity, while also appearing prepared (making effective use of notes if necessary), should be rewarded.

Finally, the IPSC is not an English language exam. Even when adjudicating speakers who have had a considerable amount of time to prepare their speeches; adjudicators should not penalise speakers for occasional grammatical errors, mispronunciations etc.

**Impromptu Speeches**

Notwithstanding the general principles laid out above, when adjudicating an impromptu speech adjudicators should consider, in particular, the guidance for speakers for impromptu speeches set out on pages 23-24 of this handbook (and should consider those pages part of the adjudication guidelines for impromptu speeches).

The key point for adjudicators to bear in mind for the impromptu speech stage is that speakers have only had 15 minutes to choose their topic (from a possible list of three) and prepare their speech on that topic. It should be evident from the speech that the speaker has made an effort to do something interesting or original with the topic.

Speakers who deliver a well-structured speech in a confident and stylistic way should be rewarded. It should also be evident from the speech that the speaker has made an effort to introduce some examples, analogies or analysis in support of their speech; but adjudicators should not penalise speakers for lack of specific knowledge on the topic.

It should be evident from the speech that the speaker has not attempted to write out their speech, word for word, during the 15 minutes preparation period. Speakers who demonstrate a sense of confidence and style, while also making effective use of notes should be rewarded.

Finally, the IPSC is not an English language exam. When adjudicating speakers who have had a limited amount of time to prepare their speeches, in particular; adjudicators should not penalise speakers for occasional grammatical errors, mispronunciations etc.
Marking Schemes

Prepared Speeches

Impromptu Speeches
Expression and Delivery – 40 marks Reasoning and Analysis – 40 marks Organisation and Prioritisation – 20 marks

The marking schemes are designed to assist adjudicators when assessing the different aspects or features of a speech (adjudicators should consider the relevant marking scheme in conjunction with the speaker scale).

Adjudicators should not feel constrained by their initial allocation of marks. Adjudication is an inherently subjective pursuit, which cannot be reduced to a purely mathematical process. It requires careful consideration of the discrete categories within the marking scheme, coupled with an ability to balance the strengths and weaknesses of different speakers in different areas.

Adjudicators must engage in a discussion with the rest of the adjudication panel after the competition, justifying their own opinion and allocation of marks, and considering the opinion and allocation of marks of other adjudicators (in an attempt to reach consensus on the rankings).

The speaker scale is designed to assist adjudicators when assessing a speaker’s overall performance (adjudicators should consider the speaker scale in conjunction with the relevant marking scheme).

Speaker Scale

Excellent – 90-100 marks
Marks should be awarded within this range for a speech that would almost certainly be the winning speech at the grand final of the IPSC. Such a speech should be delivered flawlessly, arguments should be structured to perfection, and the arguments presented should be compelling and supported by comprehensive evidence and/or analysis. The speaker should be uniquely confident and stylistic.

Very Good – 80-90 marks
Marks should be awarded within this range to a speaker who would probably be one of the six speakers in the grand final of the IPSC. Such a speech should be delivered to a very high standard, arguments should be very well structured, and the arguments presented should be supported by solid evidence and/or analysis. The speaker should display confidence and style.

Good – 70-80 marks
Marks should be awarded within this range to a speaker who would probably be one of top 20 speakers of the IPSC. Such a speech should be delivered to a high standard, arguments should be structured, and arguments should be supported by good evidence and/or analysis.

Average – 60-70 marks
Marks should be awarded within this range to a speaker who gave a reasonable performance, but had a minor fault in one of the categories of the marking scheme.

Below Average – 50-60 marks
Marks should be awarded within this range to a speaker who had minor faults in multiple categories of the marking scheme or a significant fault in one of the categories of the marking scheme.

Poor – 40-50 marks
Marks should be awarded within this range to a speaker who had significant faults in multiple categories of the marking scheme.
Feedback

The IPSC is an invaluable opportunity for participants to be exposed to a range of world-class speakers and adjudicators, providing them with the chance to learn new skills and improve their public speaking techniques. Adjudicators play an integral part in that educational process, by providing constructive feedback to speakers after the competition.

When giving feedback, adjudicators should bear in mind that each speaker is a national champion and has therefore achieved huge success already by earning their place in the competition. Adjudicators should also bear in mind that, even though there is a certain extent to which adjudication is subjective and intuitive, decisions are more likely to be understood by speakers and coaches if they are justifiable by reference to the objective criteria laid out in this handbook. This also allows speakers to focus on the specific area(s) where there is room for improvement.

Adjudicating is also a valuable learning experience for public speaking and debating coaches in particular. It gives them an insight into how their own speakers can be successful from an adjudicator’s point of view. It also hones their skills as coaches and enhances their ability to deconstruct and critique a speech, and give constructive feedback.
PREVIOUS WINNERS

2017 Luke Macaronas (Australia)
2016 Vivian García Cano (Mexico)
2015 Alma Ágústsdóttir (Iceland)
2014 Jae Hyun Park (South Korea)
2013 Isabelle Crawford (Australia)
2012 Marina Hsien Wei Tan (Malaysia)
2011 Jeon Woog Kang (South Korea)
2010 Moatex El Esrawi (Lebanon)
2009 Sebastien Ng Kuet Leong (Mauritius)
2008 Gian Carlo Dapul (Philippines)
2007 Ali Hussain Saleh Mohammed (Yemen)
2006 Konstantin Lazutin (Russia)
2005 Peng Xia (China)
2004 Patricia Evangelista (Philippines)
2003 Palesa Mohapi (South Africa)
2002 Sophia Gorgodze (Georgia)
2001 Adam Hirschmann (South Africa)
2000 Nilakshi Parnidigarmage (Sri Lanka)
1999 Sidra Iqbal (Pakistan)
1998 Adriana Ionescu (Romania)
1997 Hilda Lilie (Latvia)
1996 Liu Xin (China)
1995 Victoria Gurrall (Belgium)
1994 Taryn Moore (Netherlands)
1993 Froydis Cameron (Belgium)
1992 Pablo d’Anglade (Belgium)
1991 Frank Rieter (Netherlands)
1990 Mark Hannaby (England & Wales)
1989 Veronica Cabedo (Netherlands)
1988 Joanne Schotting (England & Wales)
1987 Sonia Munnelly (England & Wales)
1986 Winner Unknown
1985 Winner Unknown
1984 James Bolton (England & Wales)
1983 Warren Lee (Australia)
1982 Peter Hartcher (Australia)
1981 Winner Unknown
